

SUMIT BHOSALE

SENIOR QUALITY ANALYST | TEST AUTOMATION | API & PERFORMANCE TESTING

Pune, India | +91 77419 00966 | sumitbhosale0212@gmail.com

PROFESSIONAL SUMMARY

Quality engineering professional with 6+ years of experience delivering web, API, and performance testing across BFSI, investment banking, and healthcare. Hands-on expertise in Selenium WebDriver with Java, Cucumber BDD, TestNG, Rest Assured, Postman, Cypress, and JMeter. Experienced in building maintainable automation frameworks, validating complex trade and healthcare workflows, integrating test suites with CI/CD, and partnering with Agile teams to improve release confidence.

CORE EXPERTISE

Automation: Selenium WebDriver, Java, TestNG, Cucumber BDD, Cypress, Page Object Model, data-driven and hybrid frameworks

API & Performance: Rest Assured, Postman, JSON, POJO mapping, serialization/deserialization, JMeter, BlazeMeter

CI/CD & Tooling: Git, GitHub, GitLab CI/CD, Jenkins, Maven, JIRA, Zephyr, Allure, Kibana, Sumo Logic, Sauce Labs

Data & Platforms: SQL, PostgreSQL, MySQL, Windows, Linux, Apple iOS; IntelliJ IDEA, Eclipse, Visual Studio Code

Quality Practices: Functional, regression, sanity, retesting, API, database and performance testing; test planning, execution, traceability, defect reporting, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Quality Analyst | Pyramid IT Consulting

CHESS Replacement - Australian Securities Exchange (ASX) | Dec 2024 - Jan 2026

Domain: Banking, Financial Services and Insurance (BFSI)

- Designed Cucumber BDD feature files and reusable step definitions to automate multiple end-to-end trade flows.
- Automated UI validation across TCS BaNCS screens using Selenium WebDriver, Java, and Cucumber BDD.
- Automated trade submission and verified acknowledgement receipts through the Quartz Gateway.
- Validated trade-capture reports and AR FIX messages for trade submission and cancellation scenarios.
- Built parameterized GitLab CI/CD pipelines using environment, trade date, and test-case inputs for flexible execution.
- Reviewed Cucumber HTML reports, investigated failures, and communicated actionable results to stakeholders.

PROFESSIONAL EXPERIENCE - CONTINUED

Quality Analyst | Endava Solution

Health Connect 360 - Cigna, United States | Dec 2021 - Dec 2024

Domain: Healthcare | Pharmacy, medical, lab and member-engagement data workflows

- Developed web and API automation using TestNG, Cucumber BDD, Rest Assured, and data-driven Postman collections.
- Created POJO models, test classes, and shared request/response specifications for maintainable API coverage.
- Used Allure reporting to capture request, response, and execution logs for faster failure analysis.
- Executed performance tests with JMeter, recorded flows with BlazeMeter, and maintained JMX test assets.
- Analyzed test failures using Kibana, Sumo Logic, and Sauce Labs; tracked defects and execution through Zephyr Squad.
- Prepared test reports and maintained feature files and step definitions aligned with functional specifications.

Quality Analyst | AdiSoft Technologies

FNB - FirstRand Limited, South Africa | Oct 2019 - Jun 2021

Domain: Investment Banking

- Reviewed requirements and technical designs, then created detailed test plans, test cases, and traceability coverage.
- Built Selenium WebDriver automation using Java, TestNG, Page Object Model, and Maven.
- Configured Jenkins jobs to run automated suites and supported repeatable regression execution.
- Performed functional, regression, retesting, system, and monthly JMeter performance testing.
- Managed defect tracking and reporting, mapped requirements to tests and defects, and participated in test-case reviews.
- Contributed to estimation, prioritization, planning, Scrum ceremonies, and continuous improvement of test strategy.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Engineering | Savitribai Phule Pune University | 2019

Professional coursework: REST API Testing Automation; Selenium WebDriver with Java - Basic to Advanced and Frameworks
